## RESEARCH EXPERIENCE

---

- Experience with **mmWave and acoustic FMCW signal processing** techniques. I have used mmWave and acoustic FMCW sensors for localization, tracking and activity recognition of humans under indoor environments.
- Hands-on experience in **hardware prototyping** including circuit design, circuit debugging, deployment. Developed prototype hardware for Embedded Pollution Sensors mounted on a drone for air quality assessment.
- Experience conducting **human research studies**. Conducted real-time driver inattentiveness study using COTS mmWave Radars by collecting doppler shifts in the mmWave data because of drivers attentive body movements, such as talking, yawning, nodding, etc.
- Experience with design of **UAVs**, control systems, RF communication devices. Developed drones using ArduCopter APM flight controller board and mounted air quality measurement sensors.
- Experience with **Computer Networks**, IoT devices, Distributed Sensor Networks. Worked on energy optimisation in 5G Cellular Networks, using network simulator ns-3.

## EDUCATION

---

### Indian Institute of Technology Kharagpur

*Jan 2021 - present*

Doctor of Philosophy

Department of Computer Science and Engineering

### National Institute of Technology Durgapur

*August 2016 - June 2020*

Bachelor of Technology

CGPA: 8.97

Department of Electronics and Communication Engineering

### Higher Secondary School

*2016*

Central Board Of Higher Secondary Education (CBHSE)

Aggregate Percentage: 95.4

Jawahar Navodaya Vidyalaya, Birbhum

### Secondary School

*2014*

Central Board Of Secondary Education (CBSE)

Cum. GPA: 9.8

Jawahar Navodaya Vidyalaya, Birbhum

## PATENTS

---

- **Argha Sen, Anirban Das, Sandip Chakraborty “A system for in-vehicle passive monitoring of driver behaviors.”. India Patent Application: TEMP/E-1/18612/2024-KOL, filed 2nd February 2024.**

## RESEARCH PROJECTS

---

- **Real-time Multi-User Localization, Tracking, and Activity Recognition using mmWave**  
**Abstract:** With the recent advancement in 5G technology which builds on top of mmWave-based communication, we observe a massive paradigm shift towards a new form of RF sensing where

millimeter-level range-resolution can be achieved in localizing a human subject or in determining their activities. In this project, we study the extent to which we can achieve high granularity mmWave sensing under diverse scenarios such as single or multi-user, macro, or micro-user activities. Finally, we implement a system to accurately localize and track multiple users inside a room and recognize their activities. The system is robust and monitors human activity opportunistically in real time under environment-independent scenarios.

**GitHub:** <https://github.com/arghasen10/mars>

· **mmWave Sensing for Live Monitoring and On-Device Inference of Dangerous Driving**

**Abstract:** In this work, we explore the feasibility of purely using mmWave radars to detect dangerous driving behaviors. We first study characteristics of dangerous driving and find some unique patterns of range-doppler caused by 9 typical dangerous driving actions. We then develop a Fused-CNN model to detect dangerous driving instances from regular driving and classify 9 different dangerous driving actions. Through extensive experiments with 5 volunteer drivers in real driving environments, we observe that our system can distinguish dangerous driving actions with an average accuracy of 97.2%. We also compare our approach with existing state-of-the-art baselines to establish its significance.

## WORK EXPERIENCE

---

**Visiting Postgraduate Research Student, SMU, Singapore**

Aug 2023 - Feb 2024

- High-Frequency Temporal Eye Movement Features For Robust Biometric Authentication Using Event Cameras
- HyGeNe: Efficient Video Compression Using Hybrid Artificial-Spiking Neural Networks

**Teaching Assistant**

Jan 2024 - Apr 2024

- NPTEL, Sub: Computer Networks & Internet Protocol

**Teaching Assistant**

Jan 2023 - Apr 2023

- NPTEL, Sub: Computer Networks & Internet Protocol

**Junior Research Fellow (INTEL sponsored Project)**

Oct 2020 - April 2023

- Traffic Engineering for Enabling Energy-aware Design in Next Generation Cellular Networks
- mmwave-energy module for ns-3 (Completed)

**GitHub:** <https://github.com/arghasen10/mmwave-energy>

**Teaching Assistant**

Jan 2022 - Apr 2022

- NPTEL, Sub: Computer Networks & Internet Protocol

**Summer Research Intern**

May 2019 - July 2019

*Integrated Test Range, Chandipur, DRDO, Govt. of India*

- 3D Tracking and Geo-Localization of a target using Unmanned Aerial Vehicles

**Winter Research Intern**

Nov 2018 - Jan 2019

*Mobile Computing & Network Research Group MCNRG, NIT Durgapur*

- AeT-Drone: Aerial Environment Sensing and Traffic Surveillance using sensor-enabled Drone/UAV

**GitHub:** <https://github.com/arghasen10/Image-Processing-in-UAV>

**Video:** <https://www.youtube.com/watch?v=t7wGiFjItSI>

## Summer Intern

May 2018 - July 2018

*Criotam Technologies PVT LTD, Bangalore*

- Designed and developed three IoT prototypes for Sports Authority of India. (Starting Block, Force Plate, Timing Gates)
- Developed a Facial Recognition system as a LockOut-Tagout (LOTO) system for Industrial IoT.  
**Video:** <https://www.youtube.com/channel/UCeuhgjsfn7CaBQ2TpSGfjUw>

## ACHIEVEMENTS

---

- Recipient of COMSNETS LRN Travel Grant for attending IEEE PerCom 2023
- Recipient of ACM IARCS Travel Grant for attending IEEE PerCom 2023
- Recipient of IEEE INFOCOM Travel Grant for attending IEEE INFOCOM 2021
- Best Project Award at ITR Chandipur, DRDO Project title: 3D Tracking and geolocalization of the target using Unmanned Aerial Vehicles
- Participated in Festival of Innovation and Entrepreneurship (FINE) 2019 at NIF Gandhinagar, Gujarat from March 15 to 18, 2019.
- 1st Position in Techmela, The annual science exhibition organized in AAROHAN 2019. AeT-Drone: Aerial Environment Sensing and Traffic Monitoring with Drone(UAV) complete working prototype presented in Techmela.
- 1st Position in Onspot IoT Hackathon organized in AAROHAN 2019: The first position among 70 entries in IoT Hackathon. An intrusion detection system with a Raspberry Pi Zero working prototype is presented.
- IoT Hackathon Winner: 1st Position in Hackoverflow, IoT Hackathon organized in Aavishkar 2018, Techno-Management fest of NIT Durgapur by GNU LINUX USER's GROUP and HackerEarth.
- District and School Topper in Higher Secondary Examination, CBHSE.
- Secured 15883 Rank in JEE Main 2016, out of 12,07,058 applicants all over India.

## TECHNICAL SKILLS

---

**Strongest Areas** - Sensors, Signal Processing, Machine Learning, Embedded Systems, Internet Of Things, Computer networks, Unmanned Aerial Vehicles, Raspberry Pi, Arduino, UDOO Neo

**Languages** - Python, C, C++, UNIX Shell, JavaScript, Java, HTML, Android.

**Tools and Frameworks** - MmWave Studio, Matlab, Git, Android Studio, ns3, Mininet

**Operating Systems** - Linux: Ubuntu, Cent OS, Windows, Android

## POSITION OF RESPONSIBILITY

---

Vice Captain of Team Robocon, NIT Durgapur - Sep 2018-Mar 2019	<i>NIT Durgapur</i>
Teaching Assistant; Computer Networks - Jan 2023-April 2023	<i>IIT Kharagpur</i>
Teaching Assistant; Advances in Operating Systems - July 2022-Nov 2022	<i>IIT Kharagpur</i>
Teaching Assistant; PDS - Jan 2021-July 2022	<i>IIT Kharagpur</i>

## PERSONAL DETAILS

---

**Date of Birth:** 20th November, 1998

**Gender:** Male

**Nationality:** Indian

**Permanent Address:** Vill+P.O. Chatra, Rampurhat, Birbhum, West Bengal. PIN: 731238

**Phone:** (+91) 7001927155
